## 2.1 WATER

Five levels of tariffs have been approved for the 2022/23 financial year. The approved tariffs align with projected sets of consumption levels. The approved increases for the level 1, level 2, level 3 and level emergency tariffs are also 6.5%.

Tariff increases are predominantly due to the water augmentation plan to ensure security of water supply, water demand management initiatives, ensuring the management of assets at appropriate levels, sustain and enhance the maintenance programs as well as supplying water at appropriate compliance, capacity, skills, service delivery and responsiveness levels.

- All other Residential customers will be charged at the Home User Tariff, unless they meet the additional criteria in terms of the tariff policy to receive the Lifeline Tariff.
- No change in the allocation of free basic electricity, except for customers who will forfeit this when moving to the Domestic or Home User Tariff.
- A new Small Power User 3 Tariff is again proposed to provide for small  $\,$ organisations where energy consumption is very low or intermittent in use. Access requirements to this Tariff may be altered in future years.
- All Large Power User customers are now required to take their supply at the relevant Large User TOU Tariff as the discontinued Large Power User (non-TOU) tariffs are now deleted from the schedule
- All Medium Voltage Time of Use tariffs, as well as the Large User HV Time of Use tariff, now feature a split Demand Charge. For MV customers the new Network Access Charge component is set at R0.00 per kVA of Notified Maximum Demand, with the Energy Demand billed as before for the 2022/23 financial year with the view to full implementation in a future financial year.
- An Incentive payment is added to all SSEG Feed-in tariffs, which will be applicable to all SSEG Customers for the period ending 30 June 2025.
- Most consumption energy components include a non-regulated amount of 31.42c/kWh, made up of an amount of 6.67c/kWh to fund street lighting and 24.75c/kWh Contribution to Rates. Where an incentive has been applied, only the street lighting portion will be applicable.

NOTE: Where relevant, monthly Service Charges are calculated as the Daily Service Charge multiplied by the number of days in the billing period.
